BMW Emergency Brake Removal Instructions

INSTALLATION

BMW boots are glued to a plastic frame which then boot is just clipped into the cars console.

1. Pull up Emergency brake handle.

Image 1

- Carefully remove E. Brake boot by squeezing the left and right sides inwards and pulling up the rear edge of boot.

Image 1

- Pull boot inside out towards the front of the car and locate and clip the zip tie attaching the boot to the handle remove boot and mounting clip.

Image 1

4. Now that the E. Brake boot and its mounting clip are out, carefully remove the leather boot from the frame keeping note of where the seams of the original boot are located onto the boot clip. Clean the frame of glue if needed and glue your new boot onto the mounting clip using a good epoxy glue or a good fabric glue like Fabri-Tac which can be found at any Wal-Mart or fabric shop.
